

Inflation Reduction Act 25C Tax Credit

Qualified Product List

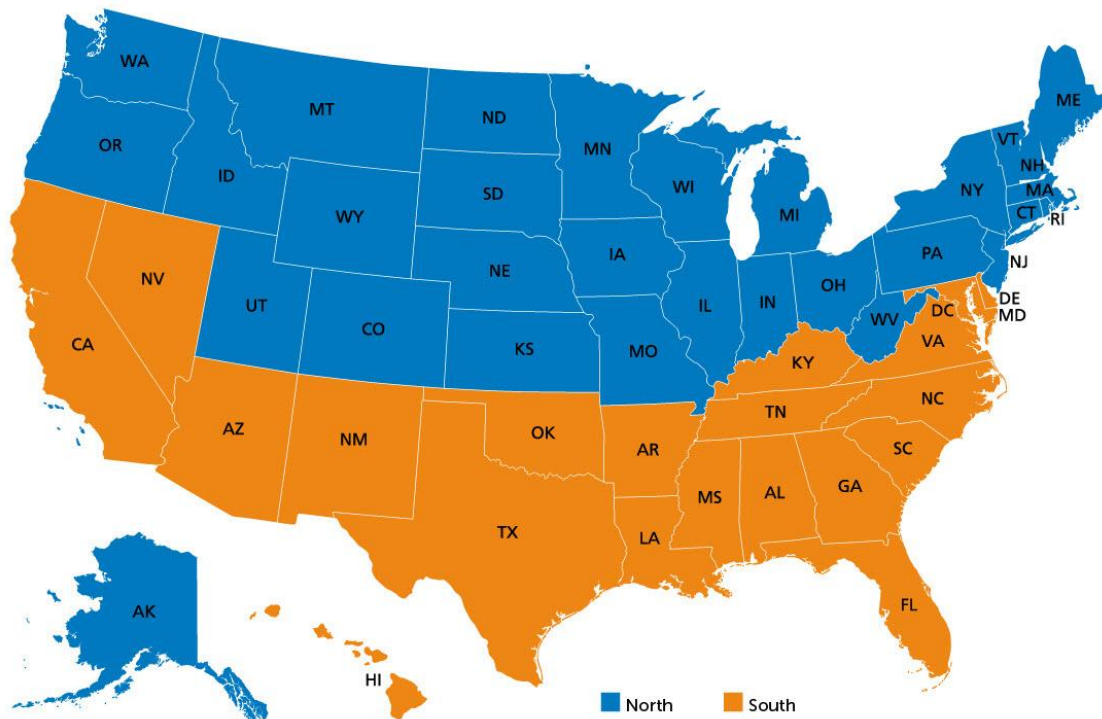

Current List as of April 21st 2023

What Is the Inflation Reduction Act of 2022?

The largest ever federal legislation addressing climate change, the IRA invests \$369 billion in clean energy sources and technologies that improve energy efficiency. Part of this includes offering significant rebates and tax incentives to homeowners who purchase heat pumps. These rebates will be administered by each State. Currently, many State agencies are utilizing current AHRI ratings to determine heat pump product requirements.
